Adventos announces new Director of Business Development, Director of Public Safety Solutions

Adventos (www.adventos.com), a leading Microsoft SharePoint company in the government sector, is proud to announce the addition of Kellee Remer, director of Business Development and Ron Woods, director of Public Safety Solutions.

“We hope to appeal to a wider audience with Kellee and Ron on our team,” said Mariano Delle Donne, Adventos CEO. “Both bring expertise to provide in-depth insight for identifying client needs and finding solutions that answer real-world problems.”

Remer has her masters in Public Administration from Eastern Michigan University. Prior to Adventos, positions included National Manager for Carfax, Inc., and Government Account Manager for 3M Company’s Traffic Safety Systems division. Remer has in-depth understanding of state government operations, which has aided her ability to analyze and apply data. She served as liaison for the International Chiefs of Police as well as the State Chiefs of Police associations for eight years, both at Carfax, Inc. and 3M.

Remer stated, “I’m thrilled to be working for a company which is focused on empowering law enforcement agencies to perform more advanced Predictive Policing initiatives. We can provide them world-class technology expertise and client-focused training and mentoring.”

Woods recently retired as a Major from the Colorado State Patrol after 28 years of service. During his state patrol career, he served as the Branch Commander for the Staff Services Branch. He has experience in training, operational development and public affairs. As director of Public Safety Solutions, he will focus on collaborating with law enforcement clients to eliminate cumbersome paperwork and focus on public safety.

“Decision makers in the law enforcement community understand the need to leverage technology to become more efficient,” said Woods. “Unfortunately, they can become overwhelmed with various solutions that may meet their current needs, but fail to have the scalability as their agency’s responsibilities evolve.”

Adventos currently works with police agencies in Colorado, Phoenix, Miami, Los Angeles and San Diego. Other government and public sector clients include the Army, Navy, Air Force, Department of Defense, Colorado Department of Public Safety and Los Angeles Sheriff’s Department.

Adventos has been a leading Microsoft SharePoint Developer since 2005. As a Gold Partner with Microsoft, Adventos combines technological implementation with highly specialized training and customized integration of SharePoint software solutions designed specifically for Federal, State and Local Government, Law Enforcement and Public Safety.
